

**SHOW YOUR CHALLENGERS THE FINGER WITH
TOUCH RACING NITRO™ FROM BRAVO GAMES STUDIOS™.**

Bravo Games Studios announces the launch of their innovative finger controlled racing game for iPhone and iPod Touch.

London, United Kingdom – April 1st 2010 – Bravo Games Studios™ (BGS) announces the launch of **Touch Racing Nitro™** on the App Store in time for the Easter break. **Touch Racing Nitro™** is a game like no other on the iPhone, sporting as it does a unique and innovative touch-control system that allows players to drive, shift, jump, launch nitros and fly over opponents, all with a swipe of your finger.

BGS has changed the face of racing games by dropping the virtual direction pad. Instead, the player's fingers become the gas pedal, brake, steering wheel and nitro power boost ensuring the player always has their finger directly on the pulse of the action. It's intuitive, meaning that there's an immediate pick-up-and-play quality to the game. Two exciting game modes, the time trial and the tournament mode, keep the excitement high and immerse the player in the racing. A large variety of environments are available to test even the most experienced racer, and 12 different vehicles cater for all racing styles. BGS has also packed in a huge amount of unlockable content, from cars to upgrades to new tracks.

"We're very excited about this, our first major iPhone launch" said Jose Miguel, CEO at BGS. "There are a lot of racing games out there but we wanted to do something unique with the controls, something that feels right on a touch screen, and I think this game showcases the innovation of our internal development teams, and we believe that **Touch Racing Nitro™** is a cracker. I'm sure iPhone and iPod touch players around the world will agree."

Touch Racing Nitro™ features:

- **3 different tournaments and racing environments** – Indoor Cup, Off-Road Cup and Supertrax Cup for speed lovers.
- **12 awesome vehicles** – including customisable buggies, 4x4's, Monster Trucks and Super Cars.
- **18 challenging tracks** - to suit racers of all abilities.
- **Amazing 3D racing visuals** – sweeping camera angles and realistic impacts that have been enhanced for the 3GS.
- **2 exciting game modes** – tournament or time trial (including ghost racing mode).
